Let's Start!

Why can't I sleep?

Learning Outcome

Describe routines and regular activities in a wider range of social and work contexts.

Ask your partner:

- Have you ever had insomnia? Do you know someone who has?
- How do you think insomnia can be treated?

Can Do Statements

- I can talk about staying healthy.
- I can discuss experiences I've had or haven't had.
- I can talk about what is necessary.

Let's Explore!

I haven't slept **for a few days running***!

* "For a few days running" means for several days in succession.

Instructions: Read the text aloud.

You haven't felt rested lately? You found that remembering was difficult? If this is true, you're going to have to get a little more sleep. Sleep is crucial to your brain's ability to learn and remember. Experiments have shown that our memory is reinforced while we sleep. So, if you want to have a better memory, you have got to get your rest.

Have you learned a lot lately? Did you sleep well that night? If you did, your brain encoded that information while you slept. Then, it transferred the data to your long term memory. When you woke, that information was ready to retrieve! If you haven't experienced this, you're going to have to give it a try.

Has exam writing always been a little difficult? Before your next big test you've got to set up a sleep schedule. You're going to have to get 8 hours of sleep each night. Then, you'll be rested, calm, and ready. Try it. You have nothing to lose!

Let's Practice!

Going without sleep can affect your health!

Instructions: Read the following text. Select all the sentences that are NOT true.

Sleep is not crucial to your brain's ability to learn. It's important to help you remember as well. You remember well even without sleep. Memory is reinforced while we sleep. After a good night's sleep, you'll be rested and calm. You'll still be tired too. You'll also be ready for your day.

Let's Practice!

You've got to get more sleep!

Instructions: Proofread the sentence. Underline the incorrect words. Rewrite the sentences correctly. Use capital letters where necessary. Read the sentences aloud. Check your pronunciation with your instructor.

1. If you haven't felt rested lately, you're going to having to get a little more sleep.
2. If you want to have a better memory, you've getted to get your rest.
3. If you can't recall what you learned yesterday, you ar go to try sleeping more.
4. Before your next big test, you have to sett uap a sleep schedule.

Extension Activity

Write a sleep diary for a week.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Every day for 5 days, write 3 sentences about how you have slept.
- Describe how long you have slept and how you feel in the morning.
- Say how you think your memory is.
- Read your sleep diary to a friend or classmate.

Self-Assessment

Yes

No

I keep a sleep diary for 5 days.

☐ ☐

I describe how I feel after I have slept.

☐ ☐

I assess my memory.

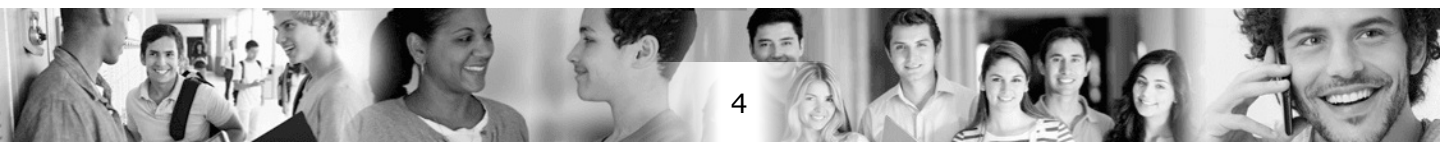

☐ ☐

I read my diary aloud.

☐ ☐

Target Words

- **to encode** (verb): to send complicated messages in a simple way
e.g. At night the day's information is encoded in your brain.
- **to transfer** (verb): to move from one position to another
e.g. The information is transferred to your long term memory.
- **to retrieve** (verb): to bring back
e.g. In the morning, the information is easy to retrieve.
- **schedule** (noun): a notation of times when something is to happen
e.g. Make up a sleep schedule.
- **calm** (adjective): slow and relaxed
e.g. You feel calm and refreshed after a good night's sleep.
- **rested** (adjective): having energy after relaxation or sleep
e.g. He always feels rested after 8 hours of sleep.
- **remembering** (noun): placing information in your mind
e.g. Are you having problems remembering things?
- **experiment** (noun): when something is tried to see if it works
e.g. Experiments show that memory and sleep are related.
- **crucial** (noun): important
e.g. Sleep is crucial for brain function.
- **to reinforce** (verb): to make stronger
e.g. Memory is reinforced while we sleep.

Learning Points

The Present Perfect Tense vs. The Simple Past Tense

When you talk about an action or an event that occurred in the past, but you do not specify when it occurred (maybe it's not relevant to say when it happened), you use the present perfect.

When you want to say when an action or an event occurred at a specific time in the past, you use the simple past.

We have some time expressions for Present Perfect which refers to indefinite time and some for simple past which refers to definite time.

Present Perfect	indefinite
I have done it ...	for a long time.
	lately.
	since this morning.
	before.
	recently.

Past Simple	definite
I did it ...	yesterday.
	last night.
	two days ago.
	at 8 o'clock.

Necessity

When you talk about what is necessary, you use *have got to* and *going to have to*.

Necessity
<i>Before your next big test, you have to set up a sleep schedule.</i>
<i>You're going to have to get 8 hours of sleep each night.</i>
<i>If you want to have a better memory, you have got to get your rest.</i>
